

# Tandem Nurse Trailer

## 1600 Gallons

## Tandem Nurse Trailer

The 1600 Tandem Farm Nurse Trailer is purpose-built for farm use and is not suitable for DOT-regulated roads. Its robust design features a 1,600-gallon tank mounted on a sturdy 7" channel iron frame, bolstered by tandem 10,000 lb axles. This configuration enables seamless transportation of 12 lb/gal fertilizer or water-based agricultural chemicals.

You have the flexibility to opt for either gooseneck or tag hitches based on your preference. The gooseneck trailer comes with a standard platform perfect for transporting chemical totes, while the tag trailers offer the choice of having the platform or not. For added safety during operation, electric brakes are provided as a standard inclusion.

## Features

- Electric Brakes
- Non-DOT Trailer (DOT Version Available)
- Adjustable Hitch
- Platform Holds Pallet or Chemical Tote
- 1,600 Gallon Capacity
- Farm Economy with Commercial Features
- Optional Mix Tank
- Optional Fenders and Lights Available
