

Nurse Trailers – 1025 Full Drain Tandem

The **1025 Full Drain Tandem** nurse trailer is designed for transport of water, liquid feed and liquid fertilizer. Constructed of 6" channel iron, tandem slipper spring axles, polyethylene tank, pipe hoops to secure tank to trailer, heavy duty six hole wheels, and four implement tires.

The **Full Drain Leg Tank** is designed to take advantage of the drainability of round tanks without the expense of a saddle. Available in black for prevention of algae.

***Note: Base trailer is intended for off-road/on-farm use only. Maximum 20 mph. Optional DOT models with brakes, lights and fenders are available for highway use. (See Industrial section for DOT approved trailers.)**

All-In-One Package	
Part No	Description
